- A270 Grid drain with tailpiece
- A306 Chrome plated faucet with gooseneck spout and wrist blade handles
- A307 Deck mounted centerset faucet
- A311 Single temperature pushbutton metering valve
- A312 Dual temperature pushbutton metering valve
- B5 Deck mounted spout (no valve)
- #204 Concealed point of use thermostatic mixing valve assembly
- WEH Stainless steel wall mounted waste enclosure housing

HAND WASH SINK COUNTERS

These multi-user hand wash sinks are ideal for use in areas that have a high volume usage and require a rugged vandal resistant fixture. The water retaining edge contains splashing and protects clothing from becoming wet through incidental contact. Faucets and trim are optional and should be specified as desired. Standard faucet holes are 4" on centers.

Options and Accessories:

- A306 Chrome plated faucet with gooseneck spout and wrist blade handles
- A307 Deck mounted centerset faucet
- #204 Concealed point of use thermostatic mixing valve assembly

HAND WASH CONSOLES

This hand wash console provides a compact fixture that includes a mirror, a paper towel dispenser, liquid soap tank and soap dispenser. These fixtures are available for recessed mounting or surface mounting. Piping connections are concealed within the fixture and are accessible through a large access panel underneath the lavatory. Faucet is not included.

DRINKING FOUNTAIN FIXTURES

This drinking fountain provides a high-low combination for users. It is wall hung with all components located within the fixture housing. The fixture is complete with two chrome plated bubblers and a two station push button valve manifold. The bottom cover is secured with stainless steel vandal resistant screws. Exposed surfaces are polished satin finish. Adequate wall support must be provided by installer.

Options and Accessories:
Metal template

LAVATORY FIXTURES

Metcraft lavatory fixtures are designed for high traffic washrooms. These fixtures are fabricated using heavy gauge stainless steel, seamlessly welded to form a one piece vandal resistant unit. Lavatory fixtures are offered in a wide variety of models, styles and options. See web site for details.

**Faucet is not included*

PCC Powder Coated Color

Options and Accessories:

- A270 1-1/4" (32mm) OD grid drain
- A306 Chrome plated faucet with gooseneck spout and wrist blade handles
- A307 Deck mounted centerset faucet
- A775 Stainless steel angle brackets
- A780 Wall mounted waste enclosure

Stainless Steel

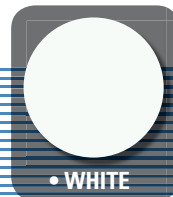

URINAL FIXTURES

Metcraft urinal fixtures are designed for high-traffic restrooms. These fixtures are fabricated using heavy gauge stainless steel, seamlessly welded to form a one piece, virtually indestructible unit. Available in wash down and blow out models for concealed and exposed flush valves. Select models can replace vitreous china with minimal changes to existing plumbing. These units flush at .5gpf. See our web site for a variety of models, styles and options.

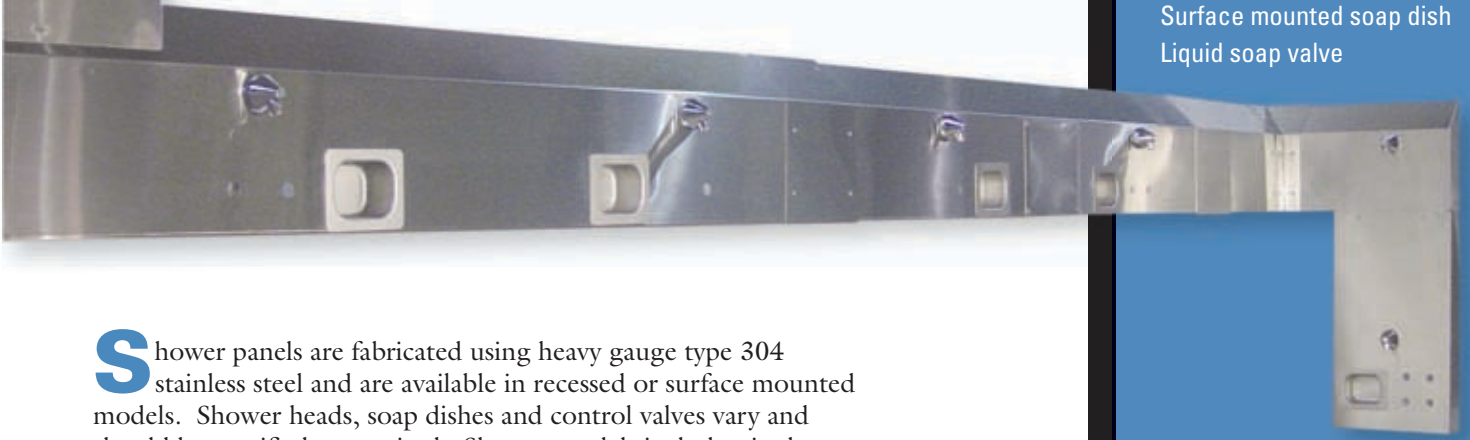

PCC Powder Coated Color

TOILET FIXTURES

All Metcraft replacement stainless steel fixtures may be ordered with powder coated colors. Color is applied electrostatically to enhance appearance and provide a hard finish that is resistant to soiling and scratching. Wall hung and floor mounted styles are available. Floor mounted styles have wall or floor outlets and are available with concealed or exposed flush valves. Modified models to match existing rough-ins are available upon request. See our web site for a variety of models, styles and options.

SHOWER PANELS

Shower panels are fabricated using heavy gauge type 304 stainless steel and are available in recessed or surface mounted models. Shower heads, soap dishes and control valves vary and should be specified as required. Shower models include: single station panels, two or three station panels and multi-station perimeter wall showers (shown). Optional supply piping covers are available for surface mounted models. See our web site for all available models.

Options:

Recessed soap dish
Surface mounted soap dish
Liquid soap valve

Features:

Shower head 17½ degree
Hot & cold, pneumatic valve
2.0 gallon per minute flow

DURABLE STAINLESS STEEL MIRRORS

Metcraft mirrors are designed and manufactured for areas where safety and vandalism are a concern. The reflective surface is heavy gauge stainless steel with a highly polished finish. Mirrors are available with anchor rods for concealed through-the-wall mounting or for securing to the wall from the front with vandal resistant fasteners. Standard as well as custom sizes are available. See our web site for all available models.
